Nicolas Couture

North America, Montreal, Canada

My preferred method of contact is by phone at 514-688-7124.

With over two decades of experience in on-premises and hybrid cloud environments, a seasoned Information Technology professional has consistently advanced and optimized DevOps methodologies within enterprise settings. Expertise lies in, system administration, infrastructure automation, configuration management, UNIX-like operating systems software development and security protocols. Demonstrated proficiency in designing, deploying, and automating cloud solutions to enhance efficiency, security, and scalability. Keen to apply extensive knowledge of Azure, Google Cloud, OCI, and AWS to support and contribute to cutting-edge cloud projects.

Core Skills

- Linux
- BASH
- Python
- Security
- Infrastructure and SDLC Automation
- Organization & Collaboration
- DevOps & SRE Practices
- Cloud Native Technologies
- Backend web application development
- Frontend web application development

Created: Sunday, 23 May 2025 at 16:34 PM EDT.

Strategic Value

I don't merely maintain systems—I transform them. My approach combines technical depth with business context to deliver solutions that create strategic advantage. I excel at identifying friction points in development workflows and infrastructure limitations that constrain business potential.

Certifications

- Linux Professional - (Canonical) 2025
- Microsoft Security Professional - (Microsoft) 2025
- Microsoft Security: AI-Powered Protection - (Microsoft) 2025
  GitHub Professional Certificate (Github) - Dec 2024
- Docker Professional Certificate (Docker) - Oct 2024
- Developing a Google SRE Culture (Google) - 2023
- Reliable Google Cloud Infrastructure: Design and Process
- Google Cloud Fundamentals: Core Infrastructure
- Digital Marketing Fundamentals (Google)
- Startup School Online - (YCombinator) 2017
- Mobile Site Certification (Google) - 2017 exp.2018
- Linux Security (Savoir-faire Linux) - Issued 2001
- Linux Administration (Savoir-faire Linux) - Issued 2001
- Linux Basics (Savoir-faire Linux) - Issued 2001

Google Cloud

Google Developer Profile

- **Generative AI with the Vertex AI Gemini API (Google) - Jun. 2024**
- **Developing a Google SRE Culture (Google) - Feb. 2024**
- **Managing Cloud Infrastructure with Terraform (Google) - Jan. 2024**
- **Google Cloud Fundamentals: Core Infrastructure (Google) - Feb. 2024**
- **Kubernetes in Google Cloud (Google) - Feb. 2020**
- **Baseline: Data, ML, AI (Google) - Feb 6, 2020**

Regulatory Frameworks Experience

- GDPR
- ISO 27001
- HIPAA
- PCI DSS

Technical Arsenal

Cloud & Infrastructure

- Multi-cloud strategy
  - Google Cloud Platform, Microsoft Azure, Amazon Web Services, Oracle Cloud Infrastructure, Alibaba Cloud
- Infrastructure as Code mastery
  - Terraform, ARM, Bicep, HCL
- Advanced containerization and cloud infrastructure
  - IaC, Terraform, Ansible, Puppet, Python, BASH

Security & Identity

- Enterprise IAM/PAM frameworks
- Zero-trust implementation
- Secret management systems

Engineering Excellence

- CI/CD pipeline design
- Microservice architecture
- Python Software Development
- Modern Node.js, JavaScript and TypeScript web frameworks
- System resilience engineering, SLIs/SLOs/SLAs

Continuous Learning Journey

- Education:
  - Computer Science foundations
  - UNIX OS
  - Focus on large-scale distributed asynchronous systems
- Professional Development
  - 20+ industry certifications spanning:
    - Cloud architecture
    - Software Engineering
    - UNIX Operating Systems
    - Global Infrastructure Security
    - Networking
    - Identity and Access Management
    - Privileged Access Management
    - Authentication and Authorization Protocol
- Self-Directed Learning:
  - Consistent investment in emerging technologies
  - Hands-on learning
- Knowledge Exchange:
  - Regular contributor of technical work across groups
  - Solid grasp of efficient online collaboration techniques
  - Documentation, post-mortems redaction when supporting production-systems
  - Strong ability to optimize SDLC workflows

Knack for sharing knowledge and recent work across teams

Skills & Expertise

Cloud Computing Platforms

- **Google Cloud Platform (GCP)**
- **Microsoft Azure**
- **Amazon Web Services (AWS)**

DevOps & Site Reliability Engineering

- **CI/CD Pipelines & Infrastructure Automation**
- **Configuration Management (BASH, Python, Ansible, Jenkins, Puppet)**
- **Containerization (Docker, Podman) & Infrastructure as Code (Terraform)**
- **Programming and Scripting (BASH, Python, JavaScript, TypeScript, PowerShell)**

Security

- **Identity and Access Management (IAM)**
- **Privileged Access Management (PAM)**
- **Secrets Management**

Linux System Administration

- **Standard Internet Services**
- **Database Administration**
- **Linux Distributions (Debian, RHEL, Ubuntu)**

Container Orchestration

- **Docker (Compose, Swarm)**
- **Kubernetes**

System Monitoring & Troubleshooting

- **Proactive Management of System Health and Performance**

Entrepreneurship

Founding CTO - Stormvault Networks (C.N.C. Inc.)

I don't manage technology. I transform business realities.

At Stormvault Networks, I create the invisible infrastructure that lets small and medium businesses stop drowning in technical complexity and start thriving in customer connections. This is secretly a completely refactored version 2.0 of my first startup, Kisscalls, where I add AI functionalities in the mix.

How I lead:

I build systems that whisper rather than shout, removing technical friction from businesses that need to focus elsewhere

- I translate complex technological problems into elegant solutions that fade into the background
- I assemble and inspire teams that understand our work isn't about code—it's about creating freedom

What I've shipped:

- Architecture that scales without demanding attention
- Protection systems that defend against both current threats and tomorrow's unknowns
- A technical foundation that serves as the evolution of my previous venture.

The change I'm making: I'm not just building software. I'm creating shelter from the technological storm so businesses can do their most meaningful work.

My measurement of success: Not uptime or feature counts, but how invisible our technology becomes to the customers we serve.

Founder, Kisscalls

2016-2018

Founded a next-generation business assistant as a service business to bridge the gap between online to offline conversions. Graduated the first Startup School Online @ YCombinator

https://www.kisscalls.com

Technologies: Python, Django, REST framework, OIDC, OAuth2 Client & Provider, Dialogflow, Google Assistant, App Engine, Polymer, Material Design, WebRTC, Firebase Hosting, Firebase Real-Time Database, Cloud Functions, Express.js, Twilio, Github, Google Data Studio, Sendgrid)

Technical Expertise

- **Automating and optimizing software builds**
- **Containerizing processes in reproducible fashion—using the same**

for development, testing and production and CI/CD pipelines
- Implementing deployment automation
- Managing cloud-native Kubernetes services
- Integrating DevOps and SRE best practices
- Extensive experience with IAM, PAM, ABAC, Azure AD, LDAP, WIF, Secret Management, Kerberos, SAML, OAuth, OpenID Connect, RBAC, MFA, Active Directory, RADIUS, SCIM, PKI, Certificate Management, Single Sign-On (SSO), Identity Federation, and Privileged Access Management

Mandates

Senior Hybrid-Cloud Infrastructure Engineer, Ubisoft Canada

2023-2024 (Hybrid, Montreal)

- Designed and implemented hybrid cloud solutions for game development using Azure.
- Automated provisioning and deployments using Azure DevOps pipelines across a hybrid multi-cloud Dotnet microservices infrastructure.
- Managed infrastructure as code (IaC) with Bicep and Terraform.
- Collaborated with senior development managers to integrate cloud services, enhancing security and performance.
- Configured MultiClusterIngress for GKE Services with Anthos Service Mesh, deploying external and internal Google Load Balancers.
- Deployed Locust for comprehensive load testing, facilitated by ASM ingress gateways.
- Improved load-testing deployment processes by >50% through optimized CI/CD pipelines.

Senior JavaScript Developer & Developer Productivity Engineer, Invue Security Products

2021-2023 (remote)

- Joined Invue during the Software Engineering department's transition from a Node.js monolith to microservices.
- Streamlined JavaScript and TypeScript microservice infrastructure by automating the build and containerization of existing microservices.
- Acted as release manager, solving issues in developers workflow by standardizing the Git workflow of developers.
- Developed a Docker Compose MVP of the cluster infrastructure, enabling consistent local development and eliminating the need for shared cloud environments.
- Improved developer proficiency in DevOps practices through workshops and training, resulting in a 100% increase in CI/CD pipeline contributions.
- Implemented CI/CD pipeline processes to enhance code quality, security, and automated testing.
- Modernized DevOps practices by replacing Ansible with Terraform and introducing Terraform Cloud and Hashicorp Vault, reducing manual interventions and improving consistency.
- Elevated security as measured by improved secret management protocols and cloud IAM processes, enhancing the overall security posture.

- **Migrated the monolith's legacy infrastructure from AWS to Google Cloud, and then to Microsoft Azure transitioning from inefficient, costly Compute Engine instances to Kubernetes.**
- **Facilitated the migration of the microservice architecture running on Kubernetes to Microsoft Azure Cloud.**
- **Enhanced developer proficiency in DevOps practices as measured by a 100% increase in contributions to CI/CD pipelines skill use by developers after conducting workshops and training sessions.**
- **Implemented CI/CD pipeline processes to improve code quality, security, and automated tests.**
- **Modernized DevOps practices adopting Terraform Cloud successfully replacing Ansible into the enterprise leading to significant reductions in manual interventions and enhanced consistency in provisioning.**

Google Cloud Integrator, Big Data & Artificial Intelligence, Innovation & AI Team, Desjardins

2020-2021 (remote)

- **Collaborated with a multidisciplinary team to bolster security for Desjardins' Big Data solutions across Google Cloud Platform, Google Workspace, and Google Marketing solutions.**
- **Spearheaded a large-scale project to migrate account and access management, synchronizing Desjardins' user identities for Single Sign-On (SSO) and transitioning access from user-owned to corporate accounts, ensuring uninterrupted service for thousands of**

users.
- Devised a governance strategy for unmanaged accounts, eliminating consumer-type accounts with access to corporate resources and ensuring all corporate identities were securely managed.
- Automated data mining tasks for user data migration using advanced LDAP queries with Active Directory, enhancing efficiency and accuracy.
- Migrated thousands of consumer-type accounts to corporate-owned identities
- Developed POCs of ETL on Apache Airflow, Cloud Composer

E-commerce Information System Environment Manager, Decathlon

2019-2020 (remote)

- Migrated and Ensured 24/7 availability of the e-commerce infrastructure to Google Cloud
- Implemented log-based metrics and centralized application logging to visualize data and create dashboards
- Maintained IaC, monitoring, system checks, and notifications

Senior DevOps Engineer, Square-Enix

2018-2019 (Montreal)

- Deployed and configured multi-regional Kubernetes clusters with

Istio service mesh leveraging Google Kubernetes Engine and Helm.
- Implemented multi-regional Spinnaker Kubernetes clusters for continuous delivery and canary deployments featuring automated pipelines triggered by container image tags.
- Technologies: Google Kubernetes Engine (GKE), Istio Service Mesh, Helm, Spinnaker, NGINX Load Balancer, Istio Route Rules, Private Container Registry, Kubernetes, Continuous Delivery, Canary Deployments, Blue/Green Deployments, Automated Pipelines

IT and Medical Imaging Consultant, M.S.S.S., Dossier santé Québec

2015 (Montreal)

- Oversaw acceptance testing of a province-wide, multi-vendor RIS, PACS, and DIR solution.
- Managed the installation and migration of large-scale on-prem Oracle database servers, with replication across 3 central locations in Quebec via private WAN.
- Developed automated asynchronous load and conformance tests.
- Created a domain-specific language (DSL) to automate end-to-end tests using YAML instead of a traditional programming language.

Technologies: Linux, DICOM, HL7, RIS, PACS, XDS, Python, BASH, Agfa IMPAX, dcm4chee

Enterprise Infrastructure Associate, Morgan Stanley

2014-2016 (Montreal)

- **Provided support for 5 enterprise web portals with 50,000 daily users.**

Technologies: Linux, Tomcat, Java, PostgreSQL, Adobe Experience Manager, Oracle Database Server on-prem administration, Python, BASH, Identity and Access Management

Solutions Architect, Hitachi ID Systems

2012-2014

- **Tailored identity and access management solution for fortune 500 companies**

Technologies: Windows Server, Active Directory, Database Management, Oracle Database <12, Lotus Notes, Solaris, Linux, AS/400, LDAP, Python, Twisted, Identity and Access Management, HTML, LaTeX, m4, BASH

Integration Specialist, Technidata Medical Software

2009-2012

- **Deployed laboratory information systems**

Technologies: Windows 2008 R2, RedHat Enterprise Linux, Solaris, AIX

Deployment Specialist and PACS Analyst, Intelerad

2005-2008

- **Deployed and upgraded large scale digital radiology software (100+ servers, 300+ RPMs)**
- **Investigated and documented system issues working closely with developers**

Technologies: Linux, RHEL, BASH, Perl, Python, DICOM, HL7

Linux System Administrator Internship, Commission Scolaire de Montreal and other Linux System Administrator roles

2001-2004

- **Installation, configuration, and administration of Linux servers, Linux Terminal Server (thinclients), shell scripting automation**

Technologies: Debian, RedHat, Cyrus, LTSP, Sendmail, Popa3d, Courier-IMAP, Bind (DNS), Yellow Pages (NIS), Firewall (IPTables), Nagios, Postfix, PostgreSQL

Volunteer Experience

- **Identity.foundation - DID:WEB - (current)**
- **PyCon US (Python Software Foundation) - (2015-2016)**
- **Linux-Québec / Facil - (2003-2004) & M.LU.G. - (1999-2004)**

Connect with Nicolas Couture

Reach me at +1-514-688-7124 (10:00-22:00 EST)

Schedule a 20-minute video call that might change everything. I've helped organizations like yours solve problems they didn't even know they had.

Book a video call with me online today.

My GitHub projects showcase my technical craftsmanship, while my LinkedIn articles demonstrate how I think about the challenges you're facing. But neither compares to a direct conversation.

My work inquiry email is work@stormvault.net.

Let’s start building something remarkable together.
